

Sciensus update.

Friday 27th August 2021

Your new and improved D365 reports will be ready next week

Further to our update earlier this week, we are pleased to say that we have completed the validation of your new D365 reports and you can expect to start receiving these new reports from next week, where applicable.

The improved, standardised, reports include a richer set of information that can be executed at any level of NHS hierarchy, with consistent definitions and views of information.

We are hopeful that the new reports will provide greater visibility, continuity and ease of sharing best practice between NHS organisations which should improve ways of working for home care teams, patients and ourselves.

What's changing?

Here is a reminder of the key changes to the terminology:

- ❖ **Hospital and Trust name** – aligned to the Organisation Data Source (ODS) NHS hierarchy, where applicable.
- ❖ **Hospital Number** – changing to Provider Reference Number.
- ❖ **HaH/Sciensus Number** - will become our Referral ID (anonymised).
- ❖ **Product Code** – aligned to the NHS Dictionary of Medicines & Devices (DM&D) dataset.
- ❖ **Service Type** - changing to 'Service' with additional data fields for 'Diagnosis' and 'Therapy'.
- ❖ **Funder Code** – changing to our new system equivalent.
- ❖ **Patient Status** –the 'Current' patient status will change to 'Active'.

Please note that the core use of each data field and its structure is not changing.

What will the new reports look like?

Here are some examples of the new reports you can expect to start receiving from next week where already subscribed:

Patient report

1	0003-E-NHS-Patients										
2	Referral ID	Hospital Number	NHS Number	First Name	Last Name	Date of Birth	Referral Created Date	Referral Status	Referral Status Detail		Service End Date

When you receive your new reports some Trusts may notice that a very small number of patient referrals are showing on multiple lines. This is a temporary issue as we migrate the data from our legacy systems to D365. In the meantime, you do not need to take any action as we are cleansing this data over the next few weeks to resolve this issue. Please note that there is no impact to any other functions, eg invoicing.

We hope you have the opportunity to engage with these new reports. We are confident that over time they will become a valued source of intelligence for yourselves and wider clinical/procurement teams. Please do reach out to your RBM to discuss what is available to you from a reporting perspective.

Next steps

Our focus now turns to the release of updated National KPIs, through D365. We are hopeful that these reports will be available from the beginning of October (September data) providing all quality assurance is met. We will communicate with you once again when appropriate in preparation for their release.

In the meantime, if you have any queries on your new reports please speak to your Regional Business Manager (RBM).

Ian Morgan, Director of NHS Services
